PRE-INSTALLATION CHECKLIST

Prior to your delivery date, please confirm the following checklist, which will help avoid any delays in your delivery and install.

X _____

Flooring selection must be on site at the beginning of install to avoid delays.

X _____

If under-cabinet lighting is being used, ensure designer is aware of selection (e.g. puck lights, LED strips) and provide sample on site at time of cabinetry install.

X _____

Ensure sinks and/or templates are on site during installation to avoid delays and return trips.

X _____

If there are other trades overlapping with the cabinetry installation, this may cause delays in the install process.

X _____

All cabinetry will be placed within or as close as possible to the room they are being installed in.

X _____

The path to your kitchen, and any other area where cabinets are to be installed, must be clear of debris for the delivery team. (e.g. snow, ice, toys, construction materials, pets)

X _____

Power (120 Volt 12 Amp.) or equivalent generator, must be provided by the contractor or homeowner.

X _____

Ensure final payment has been made five days prior to the delivery date.
